Detailed Action

Claims Renumbered

1. The Examiner acknowledges the inconsistency in numbering the claims in the "Notice of Allowance' issued on October 7, 2004. The claims are now renumbered based on the amended claims filed on July 19, 2004 and the subsequent correction made by the Examiner's Amendment' in the October 7, 2004 office action. The 'Reason for Allowance' below is now consistent with the current numbering. The Examiner's Amendment from October 7, 2004 office action is included for reference. See PTOL –37, IFW Index of Claims and IFW Issue Classification.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Applicant indicated that claim 25 is cancelled, and claims 27 and 28 now depend from claim 26, hence claims 27 and 28 now read:

- 27. The method of claim <u>26</u>, wherein the second capacity value is reset by resetting the output voltage level of the charge pump.

Application/Control Number: 09/993,336

Art Unit: 2857

- 28. The method of claim <u>26</u>, wherein the second number of flash memory cells is greater than the first number of memory cells.

Authorization for this examiner's amendment was given in a telephone interview with *Mr. Kenneth F. Kozik* on *October 7, 2004*.

Response to Applicant's Remark

3. Applicant's remark, see amendment, filed on July 19, 2004, with respect to claims 1-35 is fully considered. The Examiner acknowledges the cancellation of claims 19-25. The amended claims 1, 7 and 13 are further considered. In reference to claims 27 and 28, see Examiner's Amendment above.

Allowance

4. <u>Claims 1, 2, 6-8, 12-14, 18 and 26-35</u> are allowed. The following is an examiner's statement of reasons for allowance:

In reference to claims 1, 7, 13, 26, 30 and 35: Kawahara et al. teaches an apparatus for generating an internal voltage for a low voltage flash memories (see Kawahara et al., Abstract). The apparatus includes:

- ➤ A charge pump having a capacity that is preset to a particular value (see *Kawahara et al.*, page 126, 1st column, paragraph 3 to 2nd column, paragraph 1, and Fig. 1).
- > A measuring circuit to measure the actual capacity of the charge
 pumps and to reset the capacity of the charge pumps to a value based

Application/Control Number: 09/993,336

Art Unit: 2857

on the measured capacity (see <u>Kawahara et al</u>., page 129, 1st column, 1st paragraph and Fig. 1, sense and latch circuit).

- > An array of memory cell because memory cells in Flash technology is set in an array arrangement (see *Kawahara et al.*, Fig. 1, memory cell).
- ➤ It is inherent that the measurement and the analysis in <u>Kawahara et</u>
 <u>al</u>. is done using a computer because in Fig. 1, the decoder is interfaced to an output port which serves for carrying out further analysis as shown in Figs. 9-11.

However, <u>Kawahara et al</u>. does not teach resetting the nominal capacity value of the charge pump to a second capacity value based on the actual capacity and then characterizing the second value of the charge pump as sufficient capacity to simultaneously affect a second number of flash memory cells.

Whereas the claimed invention includes all the features noted above and further includes a charge pump having a capacity that is preset to a particular value to simultaneously affect a first number of flash memory cells at a particular voltage and also reset the charge pump to a second value based on the measured capacity to simultaneously affect a second number of flash memory cells.

The remaining claims are dependent upon 1, 7, 13, 26 and 30 and contain further limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Application/Control Number: 09/993,336

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from

the examiner should be directed to Elias Desta whose telephone number is (571)-

272-2214. The examiner can normally be reached on M-Thu (8:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the

examiner's supervisor, Marc S. Hoff can be reached on (571)-272-2216. The fax

phone numbers for the organization where this application or proceeding is

assigned are (703)-872-9306 for regular communications and After Final

communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is (571)-

272-1750.
